

# Components:

1. XAIO ESP32S3 micro controller
2. Waveshare 1.28 inch LCD watch display
3. Grove GSR sensor
4. WS2812B RGB LED
5. Jumper cables and Watch strap

# Circuit:

Code for GSR sensor:

```
const int GSR=A0;  
int sensorValue=0;  
int gsr_average=0;  
  
void setup(){  
    Serial.begin(9600);  
}  
  
void loop(){  
    long sum=0;  
    for(int i=0;i<10;i++)      //Average the 10 measurements to remove the glitch  
    {  
        sensorValue=analogRead(GSR);  
        sum += sensorValue;  
        delay(5);  
    }  
    gsr_average = sum/10;  
    Serial.println(gsr_average);  
}
```
